

Welcome to the Alamos Elementary Health Office

It is our privilege to care for the students here at AES. No care or concern is too small, the Health Office door is always open!

We are happy to assist with any physician-ordered medications or medical procedures needed during the school day. Please see the "Medications At School" link below for more information. We also provide basic first aid and assessment for any injuries that occur during the school day.

Students with injuries requiring the use of wheelchairs, crutches, splints, braces or casts require a physician's note and an indication of when they are able to resume regular activities. These students will be restricted from contact sports and other designated activities on the playground.

Due to unexpected illnesses and emergencies, current work, home, and cell phone numbers are important to our school. Please take the time to update any changes in your personal phone numbers and emergency contact numbers on Infinite campus.

Please review the following links for frequently asked questions, or feel free to contact us directly at (951)294-6762.

We are available and on campus between 9:00 am - 3:00 pm.
